Indoco Remedies announced on that its subsidiary, Indoco Remedies UK Ltd, has launched a generic cardiovascular drug in the United Kingdom. The company

has introduced Ticagrelor film-coated tablets 90 mg, a medication indicated for reducing the risk of heart attacks, strokes, myocardial infarction, and other cardiovascular conditions.

In a regulatory filing, the Mumbai-based pharmaceutical company stated that the newly launched product will be marketed and distributed throughout the UK by Clarity Pharma.

“This launch marks a significant expansion of our product portfolio and reflects our dedication to delivering high-quality, life-saving therapies to patients in the UK,” said Aditi Kare Panandikar, Managing Director of Indoco Remedies.

Ticagrelor, an antiplatelet medication, is widely used to prevent blood clots in individuals at risk of serious heart or vascular events.
